

Antonio Talavera

Houston, TX | antoniot1545@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | U.S. Citizen

SUMMARY

Cybersecurity-focused Computer Information Systems student with hands-on experience in security monitoring, threat detection, vulnerability analysis, and incident triage, paired with a Governance, Risk, and Compliance background in control evaluation and regulatory-framework analysis (NIST SP 800-171, FedRAMP, DoD SPRS). Skilled in security event monitoring, alert investigation, network fundamentals, and translating technical risk into stakeholder-ready reporting across government, financial services, and technology environments. Seeking a Cybersecurity Analyst internship to apply security monitoring, threat detection, and analytical skills in a fast-paced enterprise security environment.

EDUCATION

University of Houston

Bachelor of Science in Computer Information Systems (GPA: 3.5)

Houston, TX

Jan 2026 – Present

- Taylor Austin Broussard Legacy Scholarship Winner & CHIME Scholar
- Society of Hispanic Professional Engineers (Active Member)

Houston City College

Associate of Applied Science in Computer Systems Networking (GPA: 3.6)

Houston, TX

Jan 2020 – Dec 2024

- Microsoft's Last Mile Education Scholarship Winner
- National Cyber League Platinum Badge (Top 24%)

WORK EXPERIENCE

USDA – Agriculture Research Service, IT Systems Division (IRMO)

IT Program & Resource Management Analyst (Incoming Intern)

Houston, TX

Aug 2026 – Present

- Integrated IT portfolio and resource management, governance, planning, policy, and assessment support for the Agency
- Contribute to IT Strategic Planning, Analysis and Reporting, and Business Customer and IT Stakeholder Engagement
- Support IT Program and Portfolio Planning and Performance Analysis and Reporting

Owner / Lawn Care Operator

Self-Employed

Houston, TX

Apr 2025 – Aug 2026

- Independently manage a recurring client base of 10+ accounts, maintaining a 96% on-time service completion rate through disciplined scheduling and route planning
- Triage and resolve 6+ customer service requests weekly — prioritizing by urgency and dependency like a support ticket queue — while maintaining 100% response follow-through
- Improved route efficiency and maintained organized service documentation, reducing average job-to-job travel time by 40% and increasing daily service capacity

PROJECTS

AI-Powered Security Operations Center (SOC) Platform

Python, FastAPI, SQLite, REST API, JavaScript

[GitHub](#)

- Built a security monitoring platform that ingests and stores authentication and system security events using Python, FastAPI, and SQLite, with RESTful APIs for event ingestion, alert retrieval, and monitoring metrics
- Developed a real-time SOC dashboard to monitor security events, open alerts, severity levels, users, and source IP addresses
- Implemented a brute-force detection engine that analyzes failed login activity and automatically generates high-severity security alerts, validated against simulated enterprise security events
- Extending the platform toward AI-assisted alert triage, threat analysis, prompt-injection defense, and automated incident response (in progress)

Small Enterprise Network Design

- Designed and implemented a multi-departmental branch network for a Houston-based retail company using Cisco routers and switches
- Configured VLAN segmentation, inter-VLAN routing, and automated DHCP IP addressing to ensure secure and efficient communication

[GitHub](#)

MorseCorp Inc. – A Compliance Failure Case Study

- Analyzed the \$4.6M MorseCorp Inc. False Claims Act settlement, mapping admitted deficiencies to NIST SP 800-171, FedRAMP, DoD SPRS, SSP, and vendor risk management requirements
- Evaluated the gap between MorseCorp's reported 104 SPRS score and an independently assessed -142 score, developing recommendations for remediation tracking and executive escalation

[GitHub](#)

LEADERSHIP & VOLUNTEER EXPERIENCE

Capital One Launchpad Program

HACU Scholar

McLean, VA

Jul 2026 – Jul 2026

- Collaborated with a cross-functional cohort to design and pitch a fintech product concept — a credit-building credit card and app leveraging non-traditional data such as utility bills
- Selected for Capital One's Launchpad program in partnership with HACU and TMCF, gaining exposure to the company's business operations and culture

Society of Hispanic Professional Engineers

SHPE Junior Volunteer & Mentor

Houston, TX

Mar 2026 – Present

- Volunteered with SHPE outreach programs supporting first-gen students and families with FAFSA, scholarships, and college readiness

TECHNICAL SKILLS & CERTIFICATIONS

Security & Networking: Security Monitoring, Threat Detection, Incident Response, Vulnerability Assessment, VLAN Segmentation, TCP/IP, VPN, DNS, DHCP
GRC / Audit / Risk Frameworks: NIST SP 800-171, NIST CSF, FedRAMP, DoD SPRS, System Security Plans (SSP), Risk Management Framework (RMF), ITGC, Third-Party/Vendor Risk Management, Compliance Monitoring & Reporting
Systems & Infrastructure: Windows 10/11, Windows Server, Active Directory, Virtualization, Linux
Programming & Tools: Python, SQL, REST APIs, FastAPI, ServiceNow, Microsoft Office (Word, Excel, PowerPoint, Outlook), Technical Documentation
Certifications: CompTIA A+ (Sept 2025), CompTIA Network+ (May 2025), CompTIA Security+ (May 2025)
